

# FLANDERS

## QUALITY AND SAFETY

**Do exceptional work, safely and with integrity  
That's our uncompromising commitment to you**

As a family business, there's nothing more important to us than keeping our personnel and yours safe, in the shop and in the field. So it works out well that the processes, protocols, integrity, investments, training, and vigilance that keep people safe are also the foundation of product and service excellence.

For us, quality and safety go hand in hand.

### **Quality: We take excellence personally.**

Excellence has defined FLANDERS from day one. It's how we've built trust—by delivering consistent, high-quality work with integrity.

With fully integrated, in-house manufacturing across motors, drives, controls, and electronics, we maintain total quality control from concept to commissioning. And we stand behind it with industry-leading warranties.

### **FLANDERS Quality Statement**

Quality is built into everything we do. Through our SQDCP framework, **Safety, Quality, Delivery, Cost, and People**: we deliver safe operations, consistent performance, on-time results, and maximum value, powered by a skilled and accountable workforce.

### **Safety: Built into everything we do.**

Safety isn't an add-on, it's embedded in our culture. Every leader is accountable, every employee is empowered, and every site operates with a shared commitment to safe, healthy work environments every day.

### **Designing Technology with Safety in Mind**

We improve safety through engineered controls, automation, system redundancy, and smarter HMI design, reducing risk and minimizing maintenance exposure.
